

Motor Skills Ready Sheets

These sheets will help your preschooler prepare for writing letters and numbers.

Learning to draw straight, vertical and horizontal lines along with circles and curves will aid not only in strengthening their fine motor skills but also help them with the directions for making their letters and numbers.

Other ways you can help with their fine motor skills is with coloring, painting with a paintbrush, cutting and tearing paper, using tweezers to pick up objects and lacing cards, pasta or beads.
